

IDEAL SOMALIA

Climate change & drought are decimating Somalia's livestock ...

80% of livestock killed by drought

... leaving local youth unemployed in this underdeveloped agricultural economy.

Two thirds of youth is unemployed

Though fragile, the country's improved stability makes people look at government for solutions.

... local governments struggle to fulfill even their most basic tasks.

This undermines communities' search for resilience ...

But within the country's young and incomplete legal framework ...

... and reduces trust between local governments and its constituents.

This is where the IDEAL programme comes in:

We support 3 local governments and the local government association...

IDEAL INCLUSIVE DECISIONS AT LOCAL LEVEL

IDEAL Somalia will for example enable the revision of ALGASL's constitution to ensure all local governments are adequately represented in the national association.

... to better represent the interests of local governments at the national level in order to strengthen their mandate and promote local resilience.
